The Spiritual Life of Animals and Plants is a delightful little tome of true stories told from the sensitive viewpoint of musician Laurie Conrad. Her perception, filtered through a musician's senses and a healer's instincts, reveals a charmed dimension of understanding as she gradually begins to realize that animals and plants are truly capable of communication and spirituality. These stories - both delicate and astonishing - describe a metamorphosis of awareness that embraces, at times, no than divine healings. Lovers of animals and plants have often suspected what this book at last confirms in print: that animals and plants, trees, birds, bees and even bugs are all spiritual beings. The anecdotes of how she came to observe that animals and plants have spiritual consciousness convey the simple charms of a down-to-earth mystic whose wonderment reveals unexpected miracles. The book was designed and illustrated by Diana Souza, whose whimsical, elegant style graces the book with the enchanted air of a modern fairytale come-true.
