"Growing Up in an Amish-Jewish Cult is a trilogy divided between "Delusion," "Deception," and "Deliverance." Mack Sharky - The Elder - schmoozed his way into an Amish church, and with his ability to quote the Bible he lured 75% of the congregation from their historic faith to follow him. They left many of their Amish traditions and replaced them with his rules which increased and changed with his personal whim. This book continues our dark journey into the life of a young girl totally isolated from any world beyond a small Tennessee valley and the vast fields of a Mississippi plantation where the colony moved to work in end bondage. At six Patricia began working in the vast cotton fields chopping, hoeing, and picking cotton for 12 hours a day during the entire growing season. It was here that her joys of Paradise were gradually metamorphosed into the end pains of an earthly Hell. How could this be? How could such good people who are committed to Christ find themselves so helply lost in another man's egocentric nightmare? How can parents bear to watch their children suffer, and even die, and still show no emotion? How can a child born in a Christian home live 12 years of her childhood without ever hearing "I love you" cross the lips of her parents, family, or church? How could she go through her childhood and never hear music, laughter, or weeping? Was this really what these good parents set off to give their children? No! Unfortunately these parents had become the conduits of the same Deception that had been forced upon them.

How could it ever end?
