Are you a British or Irish Prepper, Bushcrafter or Wild Camper? Are you a fan of Post Apocalyptic fiction? You can't have failed to notice that Radio Communications are a must for anyone who are actively involved in any of these pursuits. The fiction books mention communications and how important they are to the protagonist, but rarely tell you how to get started.

Whatever your motivation, getting started with radio communications can be daunting. This guide will get you on the right track. It is packed with information that you need to know.

From choosing the right radio, making your own antennas, protecting your kit from EMP all the way through to getting licensed as a Radio Ham, this book holds your hand. Sticking to the practical and avoiding the conspiracy, this book is for you.
