Perhaps you've always had a Rubik's cube laying around your house and finally decided to learn how to solve it. Maybe you recently were introduced to the growing world of speedcubing by a friend, or watched a Youtube video. No matter your reason, this ebook will teach you how to quickly solve the 3x3 Rubik's Cube. With enough practice, these methods will enable you to consistently solve the cube in under one minute. The methods used are also designed in such a way that they can later be built upon to easily learn more advanced cubing methods such as CFOP (Fridrich Method.) Amaze your friends and family with your newfound skill! Note: This guide relies heavily on colour images and is best viewed on a Kindle Fire or similar device with colour display. You can still learn on a black & white Kindle, but pictures may be a bit harder to distinguish. (As an added bonus, if you learn on a black & white display, you will also learn how to solve the cube colourblind!)
