“My family has been protecting dragons for more than a thousand years, and the dragons are in trouble. There’s a group that wants to kill them—they’re really mean people Rhee—and the dragons are losing their invisibility”. Fifteen year old Griff Owen explains to girlfriend Rhianna as they fly dragonback over 1961 London. The ruth Order of St. George, led by the fanatical Lord Fey, want to destroy the few remaining dragons and their human allies—the scattered Protectors—and recover the Grail. Griff, Rhee and Nick, whose unique ability may help the dragons, together with young dragon Alph (ate-little-pigs-happily), battle the murderous Order—and heartbreaking traitors—to save the last dragons.”
