Living with an ability that works off her emotions has always been a challenge for Phoenix Waverly. When she's given the opportunity to use it for a greater good she's wary of what else the Guardians might want of her. Specifically the man who makes her forget herself too easily with only a look.

Once a leader of men, he's been relegated to nothing more than a footnote of history. Alexander the Great never wanted that kind of notoriety; he's always preferred to be the sort to slip silently into the shadows. Until he meets the woman he quickly realizes is meant to be his, and gets a first taste of the fire that burns hotly within. They must learn to trust one another while the Darkness encroaches into their world. No matter what happens Alexander will always protect Phoenix even from herself. She is after all, his greatest treasure.
